Paraffin

Paraffin is a semi/fully refined paraffin wax derived from Slack Wax through controlled refining. It appears as translucent crystalline solid with high melting point, low oil content, and low penetration.

Applications

- Water-resistant cloths
- Candle manufacturing
- Cosmetics & coatings
- Matchmaking and insulation materials

Product Features

- Low oil content
- High melting point
- Light color
- Low penetration
- Stable and non-fragile

Packaging

- Cartons (25/30 kg slabs)
