## Stretch Film Products

Makco is a leading manufacturer of industrial and packaging stretch films, utilizing advanced technologies and high-quality raw materials. Our stretch films are designed to offer excellent cling, clarity, tear resistance, and superior elasticity, making them the ideal solution for securing and protecting goods during transportation and storage. At Makco, we are committed to quality, innovation, and customer satisfaction. We offer a wide range of stretch film products in various sizes and thicknesses to meet the diverse needs of the packaging industry. Partner with us for safe, cost-effective, and professional packaging solutions.

The background of the entire image is a close-up, slightly blurred view of several large rolls of white plastic film. The rolls are stacked and arranged in a way that creates a sense of depth and repetition. The lighting is soft, highlighting the texture of the plastic.

# Machine Stretch

In industrial use, it is the preferred winding process in windings that require low cost, easy packaging, and high winding speed. It is produced as pre-stretch, jumbo bobbin, power and superpower.

## Features :

It is produced between 17-23 microns.

It is produced in desired weight and length.

No tearing due to high stretching.

## **Food Stretch: ( PE Food stretch )**

It is used in butchers, delicatessen, restaurants, etc. packaging areas to preserve the taste and freshness of foods.

### **Features :**

High-quality raw materials are used due to health concerns.  
safe for microwave and freezer.

produced in the desired thickness and width of the carton according to the customer's demand.

It is produced between 8-12 microns as standard.

## **Shrink Film**

Shrink film can be utilized in all products that can be packed in many different sizes and thicknesses. These films are utilizable in automatic and semi-automatic packaging.

### **Features :**

Film Width 15-300 cm.

Film thickness is between 30-200 microns.

It is transparent and shiny.

It can be produced in desired color and printing.

UV additive can be added.

It can be applied in the form of a roll or a bag, depending on its usage

## Silage Film

While providing great added value in animal nutrition, it prevents product loss.

### Features :

Width: 500-750 mm

Thickness: 25-150 micron

Color: white, black, green

UV protected

High air temperatures do not break and dry.

## Greenhouse Covers

Agricultural film (Greenhouse covers) has been developed with different characteristics as required by the product grown and the variable weather conditions in the region where it is grown. (Air temperature, UV radiation value, wind, rain, snow) In addition, thanks to the extra features added to greenhouse covers with different combinations of additives, growers are provided with more efficient and quality crops
