

UFC 85

Description	Properties
Appearance	Clear and colorless liquid
Viscosity at 25°C	240-500
Specific gravity at 20°C	1.320±0.005
PH at 25° C	7-8.5
Formaldehyde Content by wt.	60±1%
Urea Content by wt.	25+1%
Methanol Content (max)	0.2%
Storage life at 25°C	9 months
Water content	14 - 15 wt%

Urea Formaldehyde concentrate 85

Urea Formaldehyde Concentrate (UFC 85) is a clear and viscous liquid, composed of formaldehyde, urea and water. It provides high concentration of formaldehyde commercially available in an easy-to-use form.

Applications

- It is used in production of aminoplast resins such as urea formaldehyde adhesives, UF and MUF impregnation resins.
- It is used as anti-caking agent in the process of urea production.

Packaging

20 liter HDPE plastic drums, 20 – 22 MT stainless steel tanks and ISO tank containers, IBC tanks and Flexi bag
